Nunc quis urna dictum turpis accumsan semper.

3 Emails

This section is optional, and can be omitted entirely if you prefer. If you want to include e-mails, you should either include all authors' e-mails or just the contact author(s)' ones.

Start the e-mails section with the `\emails` command. After that, write all emails you want to include separated by a comma and a space, following the same order used for the authors (*i.e.*, the first e-mail should correspond to the first author, the second e-mail to the second author and so on).

You may “contract” consecutive e-mails on the same domain as shown in this example (write the users' part within curly brackets, followed by the domain name). Only e-mails of the exact same domain may be contracted. For instance, contracting “person@example.com” and “other@test.example.com” is not allowed because the domains are different.
